Combined Training of Working At Heights & Elevated Course Clarification

For those interested in participating in our combined training of Working At Heights & Elevated Platform training needs to be aware that these are two (2) separate courses.

Working At Heights is a Ministry of Labour approved course and can only be taught by an authorized training provider. This is a stand-alone course.

Elevated Platform training is a separate entity. Training is required in order to safely operate the equipment. The Elevated Work Platform program is not part of the Ministry of Labour/Chief Prevention Office program.

When we add the Elevated Work Platform to the approved Working at Heights it allows us to complete both in an extended training schedule.
